DETAILED ACTION

1. Claims 1, 3-10 and 12 are allowed. Claims 1, 3-10 and 12 are renumbered as claims 1-10.

Allowable Subject Matter

2. The following is an examiner's statement of reasons for allowance: The closest prior art of record (Childs) discloses an unique authenticated user credential is received and stored on a client utilizing security procedure to prevent credential tampering, in response to a successful authentication; the authenticated credential is used to access the secure network resources. However, the prior art of record does not explicitly disclose executing a ClientID retrieval process with the client application when the client application subsequently attempts to connect to the backend, including retrieving the first and second scrambled versions of the ClientID stored in the first and second locations and unscrambling the first and second scrambled versions of the ClientID using first and second keys to obtain first and second unscrambled values; and comparing the first and second unscrambled values to determine an occurrence of a match between the first and second unscrambled values in light of other features disclosed in independent claims 1 and 10.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Dyson U.S. Pat. No. 5050212 discloses method for verifying the integrity of a file stored separately from a computer.

Witt et al. U.S. Pat. No. 6971018 discloses file protection service for a computer system.
